

Promenet

Helping schools with their IT needs for over 20 years.

A (free) introductory call with one of our senior engineers will help you define your short- and long-term IT goals. We can discuss your school's specific IT needs answering questions such as:

- Is my network secure from today's cyber-attacks?
- What's the best way to improve network performance?
- What's a better way to manage my network with limited resources?

We can help you understand why firewalls are not enough, and why a multi-layered approach is a must in today's complex cybersecurity landscape.

Last month, one of our senior engineers conducted a seminar on preparing for inevitable cybersecurity threats for PAIS members. If you did not get a chance to attend, here is a link to slides from the presentation:

Protecting schools from today's cyber-attacks is not all we do. With more than 30 engineers in the field and over 20 years of experience, we can help answer your questions, solve your issues and help you plan for the future. Please call me to set up an introductory meeting with one of my senior engineers. We'd love to share our ideas with you.
